Locating On-Line Documentation at SRI-ARC

Where there used to be one, there are now two files to help users locate user documentation and other files available in NLS:

<NIC>LOCATOR will lead the user to NIC functional documents by means of links. Its branch labeled "ARC SYSTEM DOCUMENTATION" will direct the user to <USERGUIDES>ARCLOCATOR.

(userguides, arclocator, l:w)

<USERGUIDES>ARCLOCATOR includes documentation of the SRI-ARC system. Many ARC features are available for Network use, and the documents in <USERGUIDES>ARCLOCATOR should serve to introduce users to these capabilities.

(userguides, arclocator, l:w)

These files are formatted in a way that allows the documents to be easily accessed by inexperienced NLS users. Both files contain instructions for their use as branch one. To see these instructions:

L[oad] F[ile] <nic>locator CR

P[rint] B[ranch] .1 CA wn CA

Please send ideas and suggestions for the LOCATOR files to KIRK or NDM at SRI-ARC.
